

ENFORCER

HEAVY DUTY SLED

A cost effective option for schools and clubs

This machine is ideal for manicured and artificial playing surfaces

Weight can be added for extra resistance

Suitable for juniors through to elite

BENEFITS

The Heavy Duty Sled is similar in weight to the Pro Simulator model and ideal for clubs and schools alike.

This machine is suitable for manicured and artificial playing surfaces.

Weight can be added to this machine for further resistance.

FEATURES

The checker plates cross hatched pattern faces down and gives increased resistance even on the wettest surfaces. This is a unique feature of Enforcer machines.

The Enforcer Heavy Duty Sled does not have the mechanical brake and roller system.

This machine is supplied with the width adjustable pressure measuring headboard only.

The Heavy Duty Sled weighs 400kg and is 204cm wide x 214cm long x 93cm high.

These machines are fitted with our newly developed binding pads which were designed in consultation with Andrew Blades and Laurie Fisher.

All Enforcer machines are powder coated twice, once with anti-rust and the second coat is for the tone and durability. Machines can be painted in any colour upon request.

Options

Spring loaded pressure measuring width adjustable compression headboard.
