

ENFORCER

LITE

A lighter, cost-effective option for schools and clubs

Checker plate floor gives it more weight

Suitable for juniors through to club level

BENEFITS

The Enforcer Lite is a lighter, cost-effective option for schools and clubs.

This machine operates as a basic sled with counterweights for ease of mobility and maneuverability.

The hydraulic transport wheel system is capable of lifting an extra 750kgs which is over and above the existing weight of the machine.

FEATURES

The Enforcer Lite range is durable and manufactured from 50mm SHS with a 3mm wall thickness. This gives the machines more weight than its competitors without the extra bulk. This model features a 3mm checker plate floor.

This machine does not have the mechanical brake and roller system.

It has the same dimensions as the Heavy Duty Sled, 204cm wide x 214cm long x 93cm high, however, it is only half the weight at 200kg.

All Enforcer machines are powder coated twice, once with anti-rust and the second coat is for the tone and durability. Machines can be painted in any colour upon request.

Models

Enforcer Lite comes in three different models.

1. Enforcer Lite width adjustable, non-compression with hydraulic transport wheel system.
2. Enforcer Lite non width adjustable with hydraulic transport wheel system.
3. Enforcer Lite non Width adjustable with no hydraulic transport wheel system.
