

ASTROMAX

Specifically designed for astro surfaces or artificial grass, so damage to the playing surface is non-existent

The premium model of Enforcer's elite rugby scrummaging machines

Best suited for senior school players, Club rugby and international sides

BENEFITS

The Enforcer AstroMax is specifically designed for astro surfaces or artificial grass and can also be used on normal grass surfaces.

Because of the rubber toothed belt, damage to the playing surface is non-existent.

FEATURES

The resistance to the pack comes from a 1.3 metre wide, ground engaging, heavy duty toothed rubber belt with a tractor tread type surface.

The twin hydraulic braking system offers enough resistance to stall even the strongest of scrums.

The braking pressure is applied by rotating a hydraulic hand wheel.

The standard model includes a manual pressure measuring headrest.

This machine weighs 750kg and is 204cm wide x 260cm long x 95cm high.

New binding pads have been developed to accommodate for the 2013 changes to scrummaging laws. These pads are a standard feature on the current models and can easily be retro fitted to all existing AstroMax machines.

All Enforcer machines are powder coated twice, once with anti-rust powder and the second coat is for the tone and durability. Machines can be painted in any colour upon request.

Options

Pressure measuring digital readout.
